CAREER OBJECTIVE

AI Engineer with hands-on experience building and deploying Generative AI applications, including RAG pipelines and agentic workflows. Enjoys working on production-grade systems, collaborating with cross-functional teams, and applying LLMs to solve real-world problems, particularly in the PropTech domain.

SKILLS

Data Structures and Algorithms

Generative AI & LLM Applications

RAG Pipelines, Prompt Engineering, LLM Integration, Embedding Models, LangChain, Hugging Face, Chunking & Retrieval Tuning

Web Platforms and Tools

WixStudio, Framer, Git, GitHub

Agentic Workflows & Automation

N8N, Make

Programming languages

JAVA, Python, C, JavaScript, HTML, SQL, CSS

Machine Learning, Deep Learning, Transformers

Database Management & Vector Search

MySQL, Firebase, Vector Databases (FAISS)

Data visualisation

PowerBI, Excel

INTERSHIPS

Salesforce, Agentblazer Champion Program

- Gained hands-on experience in Salesforce fundamentals, Apex, LWC, and process automation. Earned multiple Salesforce super badges including Apex Specialist

PROJECTS

Quantix, RAG AGENT

- Built a RAG-based math-solving agent that retrieves relevant concepts and formulas to generate step-by-step solutions.
- Reduced hallucinations and improved answer accuracy by grounding LLM reasoning in retrieved mathematical context.

Built an interactive Nykaa-inspired e-commerce site using Wix Studio

- Integrated 3D models, animations, and YouTube embeds to deliver rich, interactive learning content.
- Implemented text-to-speech and an AI chatbot to enhance accessibility and real-time learner support.

Web Development Projects (HTML, CSS, JavaScript)

- Designed and developed responsive static websites using HTML and CSS, focusing on clean layout and basic UI principles.
- Built interactive JavaScript-based games (Game-My-Number, Pig Game) implementing user input handling, game logic, and state management.

Restaurant Menu Page

- Developed a dynamic restaurant menu page using HTML, CSS, and JavaScript with clean, responsive UI.
- Integrated a REST API to fetch and render menu data dynamically, improving scalability and content updates.

EDUCATION

B-Tech, Artificial Intelligence, VIDYA JYOTHI INSTITUTE OF TECHNOLOGY

Current CGPA - 9.24 (Till 5th Semester)

Intermediate- Kendriya Vidyalaya No.2 Golconda

Percentage - 77%

Class X- Kendriya Vidyalaya No.2 Golconda

GPA-8.2

CERTIFICATES

- Certified in HTML & CSS through Udemy.
- CISCO Networking Academy Python language
- Pursuing JavaScript development skills through an online course on Udemy.

INTERESTS

- Classical Dance, Reading Facts, History, Badminton, Football, Basketball Running, Poetry.

EXTRA CURRICULAR ACTIVITIES

Entrepreneurship Cell (E-Cell), Marketing & Public Relations Team Member

Helped with outreach, created promotional content, and worked with the team to increase participation in E-Cell events.

Echo Club - Echo Speaks, Public Speaking & Communication Member

Engaged in speech delivery, debates, and anchoring events, helping enhance club activities related to oratory and expressive skills.

Vriti - Entrepreneurship Club, Research & Development (R&D) Member

Participated in workshops, idea pitching, and networking activities focused on startup and business development culture.

Yukti Club, Content Writing & Documentation Team

Wrote event content and official documents, helped organize and promote college fests and functions, and gave captions for social media reels.

Tarang - Dance Club, Performer & Team Member

Performed in college-level dance events and contributed to cultural programs and annual functions.
