CAREER OBJECTIVE

AI Engineer with hands-on experience building and deploying Generative AI applications, including RAG pipelines and agentic workflows, focused on delivering production-grade AI systems. Collaborates closely with cross functional teams to apply LLM-driven solutions to real-world challenges in the PropTech domain.

TECHNICAL SKILLS

Data Structures and Algorithms

Generative AI & LLM Applications

RAG Pipelines, Prompt Engineering, LLM Integration, Embedding Models, Transformers, Chunking & Retrieval Tuning, Machine Learning, Deep Learning

Database Management & Vector Search

MySQL, Firebase, Vector Databases (FAISS, Chroma)

Agentic Workflows & Automation

n8n, Make, LangChain, LangGraph, LangSmith

Programming Languages

JAVA, Python, C, JavaScript, HTML, SQL, CSS

Frontend & Backend

React.js (Vite), Next.js, FastAPI, REST APIs, Styled-Components, Framer Motion, CORS Configuration

Web Platforms & Tools

Git, GitHub, Wix Studio, Figma

Data visualisation

PowerBI, Excel

PROFESSIONAL EXPERIENCE

Research Intern, Quantum Gandiva AI

03/2026 – Present

- Developed and applied evaluation (Evals) frameworks to assess LLM outputs for accuracy, relevance, and safety.
- Assisted in designing and agentic workflows for real-world problem statements.

Intern, Salesforce, Agentblazer Champion Program

10/2025 – Present

- Gained hands-on experience in Salesforce fundamentals, Apex, LWC, and process automation. Earned multiple Salesforce super badges including Apex Specialist

PROJECTS

TEASER-RAG-AGENT

- Built a multimodal Retrieval-Augmented Generation (RAG) system using FastAPI, React, FAISS, and LLM APIs to answer queries from text, image, audio, and video inputs.
- Designed an end-to-end retrieval pipeline with data ingestion, chunking, embedding generation, and semantic similarity search for context-aware responses.
- Integrated multimodal embeddings and real-time response streaming, enabling grounded answers across heterogeneous data sources.

Quantix, Math Solver

- Built a RAG-based math-solving agent that retrieves relevant concepts and formulas to generate step-by-step solutions.
- Reduced hallucinations and improved answer accuracy by grounding LLM reasoning in retrieved mathematical context

Web Development Projects (HTML, CSS, JavaScript)

- Designed and developed responsive static websites using HTML and CSS, focusing on clean layout and basic UI principles.
- Built interactive JavaScript-based games (Game-My-Number, Pig Game) implementing user input handling, game logic, and state management.

Nykaa-inspired e-commerce site

- Delivered an interactive learning platform by integrating 3D models, animations, and YouTube embeds with a responsive, cross-device UI.
- Implemented text-to-speech and an AI chatbot to provide accessible content delivery and real-time learner support.

EDUCATION

B-Tech, Artificial Intelligence, VIDYA JYOTHI INSTITUTE OF TECHNOLOGY 2023 – Present
Current CGPA - 9.25 (till 5th semester)

Intermediate, Kendriya Vidyalaya No.2 Golconda 2021 – 2023
Percentage - 77%

Class X, Kendriya Vidyalaya No.2 Golconda 2021
GPA- 8.2

CERTIFICATIONS

Certified in HTML & CSS
(Udemy - 11/2024)

**Pursuing JavaScript
development skills**
(Udemy - 05/2023)

**CISCO Networking Academy
Python language**
(Cisco - 04/2023)

PowerBI
(07/2023)

ORGANISATIONS

Marketing & Public Relations Team Member

Helped with outreach, created promotional content, and worked with the team to increase participation in E-Cell events.

Public Speaking & Communication Member

Engaged in speech delivery, debates, and anchoring events, helping enhance club activities related to oratory and expressive skills.

Performer & Team Member

Performed in college-level dance events and contributed to cultural programs and annual functions.

Content Writing & Documentation Team

Research & Development (R&D) Member

HOBBIES

Classical dance, History, Running
